Volume 9 includes three **Full Articles** on supporting students through citizen science pedagogy, pronunciation instruction, and strengths-based literacy teaching and two **Language Teaching Professionals' Interests** articles on generative AI classroom applications and culturally-responsive teaching. Two articles involve **English Learner Policy** issues on EL reclassification through portfolios and ML teacher certification, which prompted us to make a special journal section this year. Finally, this issue wraps up with a **Book Review** on trauma-informed pedagogy.

We hope you enjoy this edition!
